

Enables versatile color expression according to the hair types and desired color tones.

A unique transparency achieved by a color design that minimizes dullness.

**base color** base color : 21 colors

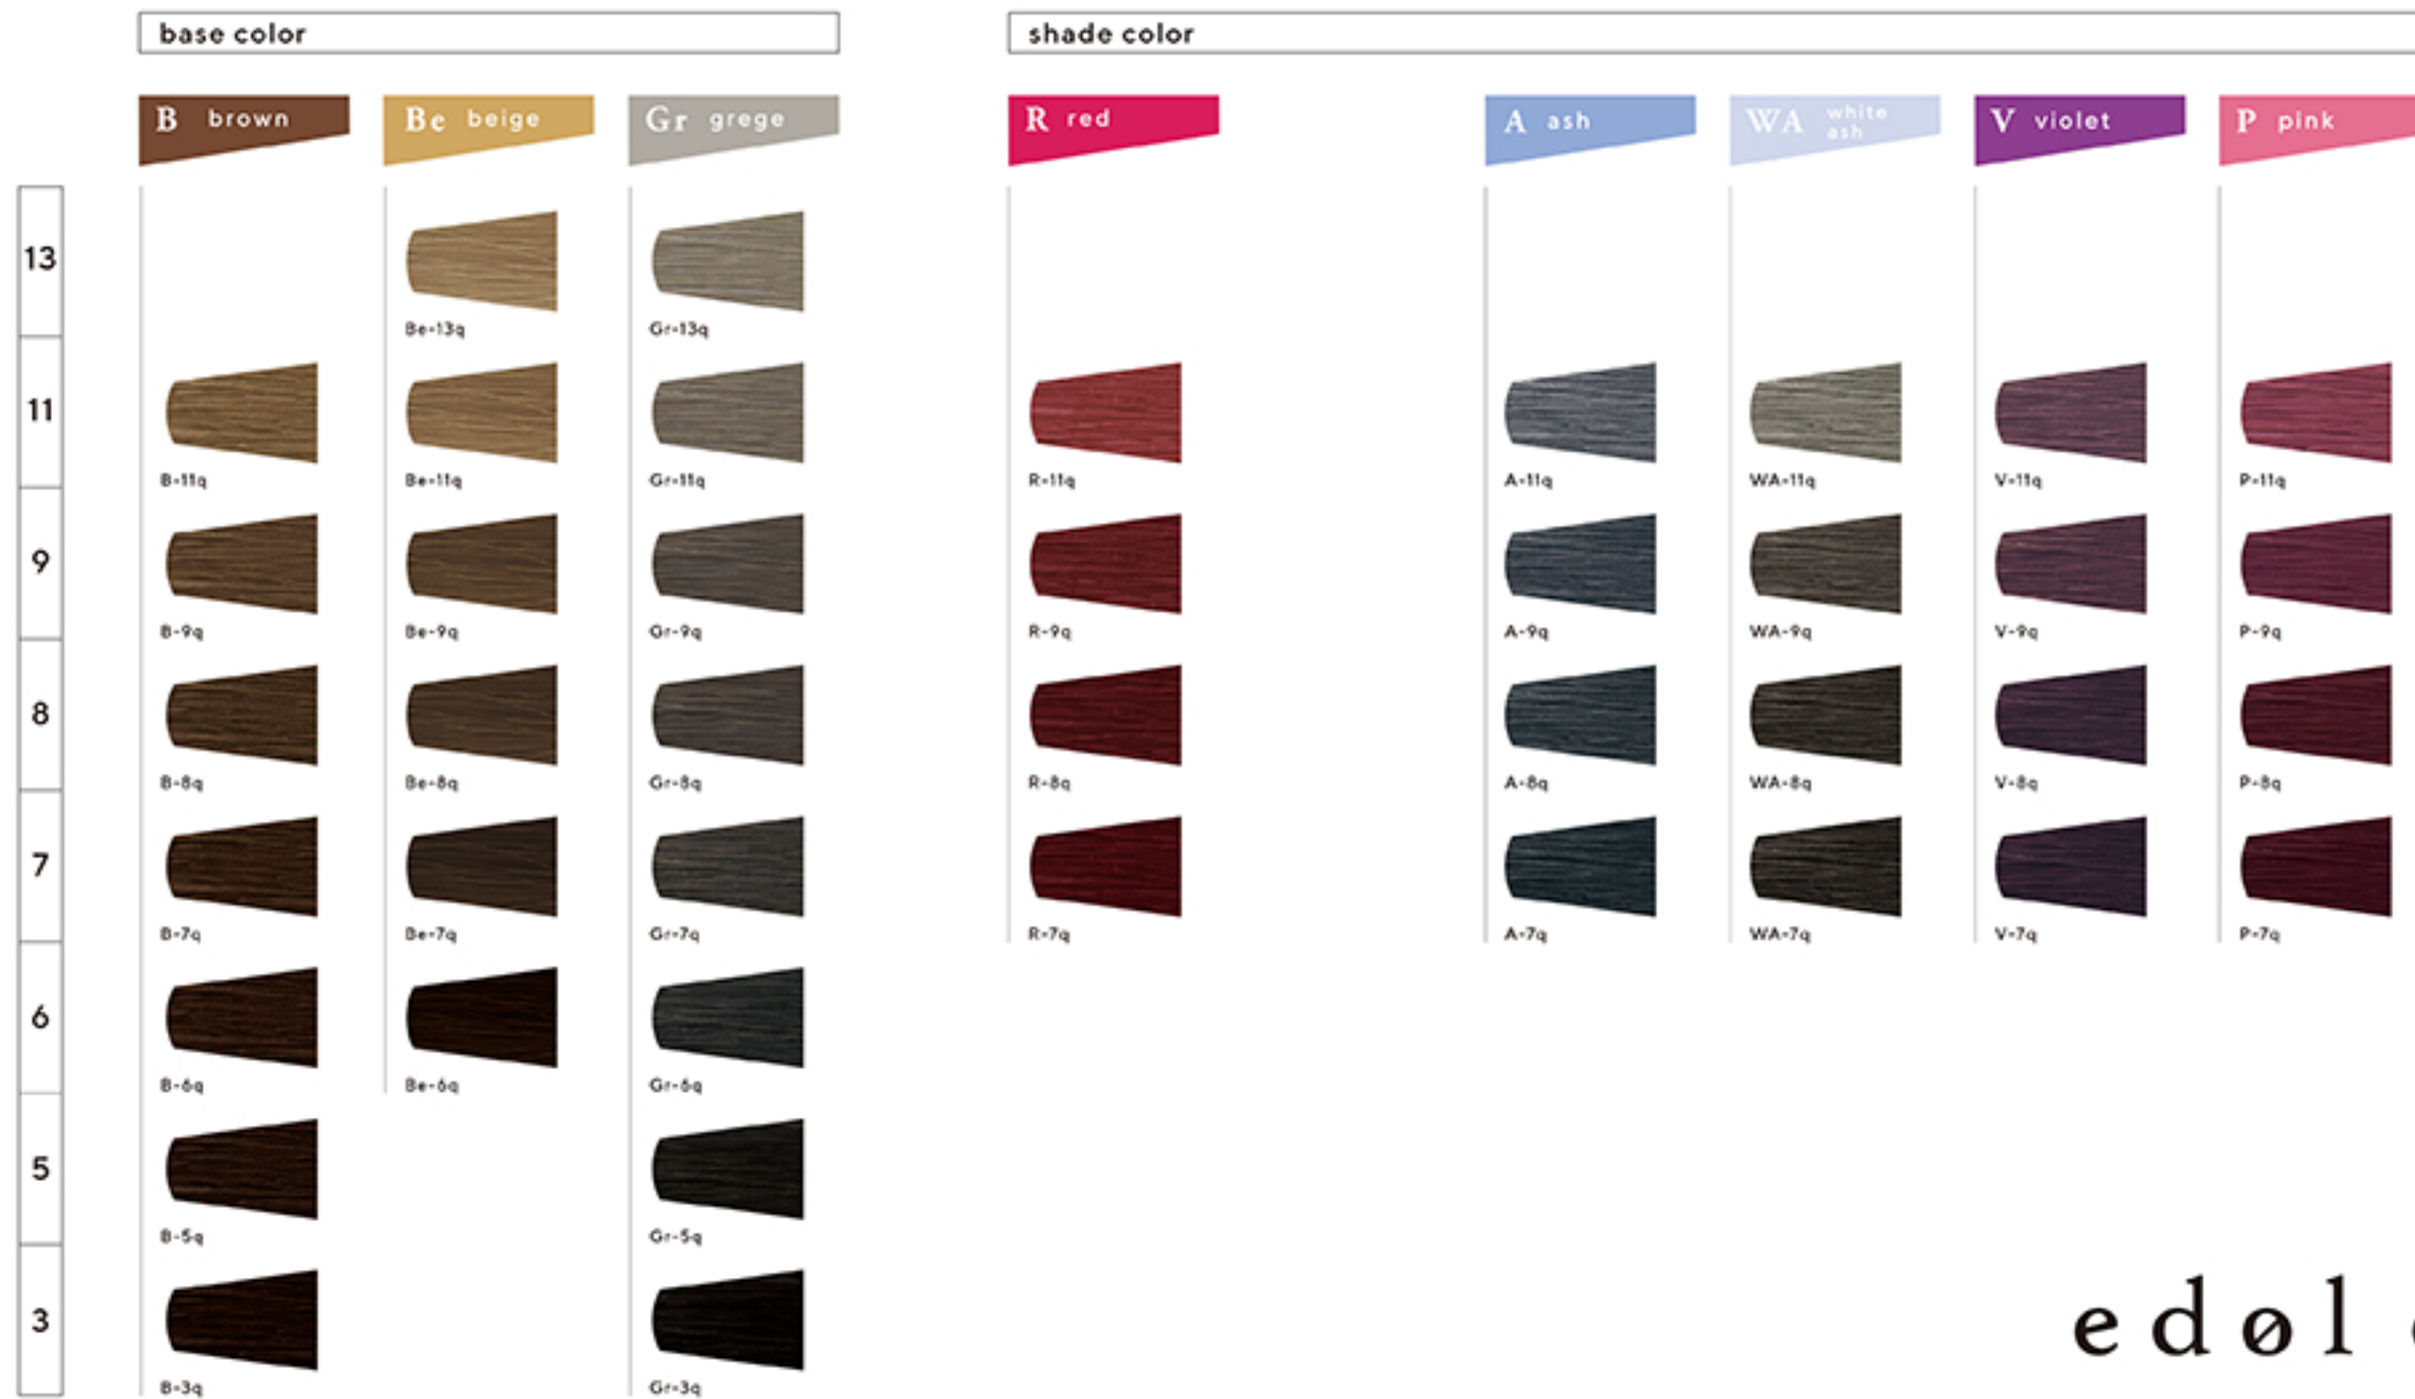

**shade color** shade color : 20 colors

**Enjoy the texture**

The base color represents the texture and nuance of the color. It achieves natural color tones in any gray hair types.

**Enjoy the colors**

The shade color represents the color characteristics and image. It expands the range of design in gray hair.

**edol qon standard mixing ratio**

edol qon (1st agent) 1+1 edol oxy (2nd agent)

□ edol qon color number display: e.g., B-3q → B/ color tone, 3/ brightness

\*This color chart is a visualization of dyeing white hair with edol qon.  
\*The colors on the printed material may vary from the actual color tone.
